Discussion

Do you know your MBTI type, your blood type, and your zodiac sign?

Do you agree with your MBTI result? Which part fits you, and which does not?

How much do you believe the blood-type chart? Why?

When do you find yourself checking your horoscope the most?

Why are MBTI and zodiac signs so popular with young people now?

Do your friends match their star sign, or is it just fun?

Do you use MBTI to choose friends or partners? Be honest.

Have you ever changed your mind about someone because of their sign?

Are these systems simple fun, or unfair labels? What do you think?

Can a twelve-row chart really describe a whole person?

Do you and your coworkers talk about MBTI at work?

Would you ever put your MBTI type on a job application?

Which feels more accurate for you — MBTI, blood type, or zodiac?

Do you read your weekly horoscope? Do you believe it?

Why do people like putting themselves and others into types?

Is it unfair to judge someone by their sign before you know them?

What personality test would you design to describe yourself?

If these charts are not real science, why do they still feel true?

Would you date someone whose sign or type you dislike?

Do people use "it's my sign" as an excuse for bad behavior?
